

MohammadHossein Moradi

Senior WordPress Developer | Headless & Decoupled Architecture

Yerevan, Armenia • +374-93372545 • themedesert.com • linkedin.com/in/midasmoradi

PROFESSIONAL SUMMARY

High-impact WordPress expert with extensive experience architecting high-performance, secure, and commercially successful themes. Proven track record of delivering ThemeForest-standard products that pair aesthetic excellence with sub-second loading speeds. Specialized in headless / decoupled WordPress, leveraging the WP REST API and WPGraphQL with React and Next.js front-ends, plus Go-based bridge services, to deliver scalable, future-proof, multi-channel content platforms.

TECHNICAL CORE COMPETENCIES

Headless WordPress: Decoupled architecture with WP REST API & WPGraphQL; Next.js / React front-ends using SSG & ISR for sub-second, multi-channel content delivery.

WordPress Ecosystem: Advanced theme & plugin development from scratch, WP-CLI, Gutenberg block patterns, Custom Post Types, ACF, REST API integration.

Web Technologies: PHP (Advanced), JavaScript (ES6+), HTML5, CSS3, React.js, Next.js, GraphQL, Go (Golang).

Performance & Security: Core Web Vitals optimization, database optimization, secure coding standards (SQLi / XSS mitigation).

PROFESSIONAL EXPERIENCE

Lead WordPress Developer — Independent / Freelance 2018 – Present

- Toranj WordPress Theme: Architected and developed the #1 best-selling restaurant/café theme on the RTL-Theme marketplace; engineered a complex booking system with comprehensive RTL support.
- Inverto Theme: Leading development of a high-performance, multipurpose ThemeForest theme built on a modular architecture.
- Headless & Strategic Integration: Built decoupled WordPress solutions exposing content via REST API & WPGraphQL to Next.js front-ends, with Go-based caching/bridge services unifying multiple data sources.

SELECTED PROJECT

Headless WordPress Blog Platform Next.js + WPGraphQL

- Decoupled WordPress back-end serving content through WPGraphQL to a statically generated (SSG/ISR) Next.js front-end, achieving near-instant page loads and top Core Web Vitals scores.
- Modeled custom content with Advanced Custom Fields (ACF) exposed through GraphQL for a clean, query-only-what-you-need data layer.

MARKET RECOGNITION

Top-rated developer on the RTL-Theme marketplace, consistently delivering best-selling, high-quality digital products.
